

Bacillus Coagulans™

(Intestinal Flora)

Recommended Use:

- ▶ Intestinal flora
- ▶ Constipation, diarrhea
- ▶ Allergies
- ▶ Immuno-modulating
- ▶ Digestive issues: gas & bloating
- ▶ Lactose intolerance

Bacillus Coagulans is a shelf-stable probiotic that helps the body to restore healthy flora in the gastrointestinal system.

B. coagulans passes through the stomach in its spore form and upon arriving in the duodenum, germinates, multiplies rapidly and becomes metabolically active in the intestines producing lactic acid (right spinning).

This form of probiotic helps normalize pH, inhibits pathogenic bacteria growth and is especially useful in cases of diarrhea.

The Benefits of Bacillus Coagulans:

- Reduces or eliminates harmful bacteria in the lower intestines.
- Helps restore a healthy colonic flora.
- Reduces intestinal toxicity
- Enhances both systemic, as well as humoral immune responses
- Helps the body produce vitamins, especially the B-group
- Stimulates bowel movement and relieves constipation
- Aids production of digestive enzymes and decreases bloating
- Stops diarrhea by controlling the intestinal flora.
- Helps to overcome lactose intolerance
- Lowers the body's harmful cholesterol (LDL), increasing good cholesterol (HDL)
- Ideal to take with antibiotics to replenish friendly intestinal flora and prevents development of resistant organisms
- Use during and after parasite treatment to prevent pathogenic growth, restore intestinal flora and reestablish ecological balance

Medicinal Ingredients: Each vegetarian capsule contains a proprietary blend of acid-stable and shelf-stable:
 Bacillus Coagulans 1 billion colony forming units
 Fructooligosaccharides (FOS) 250 mg

Non-medicinal Ingredients: Magnesium stearate, maltodextrin, hydroxypropyl methylcellulose, water.

Recommended Dose (adults): Take 1-2 capsules per day.

Cautions/Warnings: If you have nausea, fever, vomiting, bloody diarrhoea, severe digestive upset or severe abdominal pain, consult a health care practitioner prior to use. If you have an immune-compromised condition (e.g. AIDS, lymphoma, patients undergoing long-term corticosteroid treatment), do not use this product. This product has come into contact with dairy protein. If you have a dairy allergy, do not use this product. If you are on antibiotic(s), take at least 2-3 hours before or after.
