

Polygonum (Homeopathic)

Recommended Use:

- Arthritis
- Rheumatic conditions
- Gout
- Neuralgic pain
- Joints

Polygonum is a specially formulated homeopathic remedy that provides relief from symptoms related to arthritis and rheumatism. It works by increasing the excretion of uric acid, improves the circulatory flow of the capillaries and tissues and has anti-inflammatory effects.

This remedy is specifically used for arthritis, inflammatory and degeneration afflictions of the joints, rheumatism arthrosis, spondylarthrosis, cervical and lumbar syndrome and uric-acid diathesis (gout). It is also proven to be effective for neuralgic pain, neuritis and ischialgia.

Clinical Pearls

Polygonum has shown to be specifically effective in the small joints of the hands and feet.

For arthritic conditions and gout, combine all contents of Polygonum, (anti-inflammatory, joints), Solidago (kidneys) and Aesculus (improve circulation) into one large bottle and take one teaspoon mixed in 8 oz. of water three times daily. In acute conditions, take two teaspoons five times daily.

For rheumatic conditions combine 15 to 25 drops of Polygonum with 10 drops of Allernest and take three times daily. Also, consider using a proteolytic enzyme to add an immune complex eliminating effect.

Refer to arthritis and rheumatism protocols for more details.

Ingredients:

Colchicum autumnale
Colocynthis

Gnaphalium polycephalum

Ichthyolum

Kalium iodatum

Polygonum aviculare

Acorus calamus

Rhododendron

chrysanthum
